

HELLO, DO YOU COME HERE OFTEN?

Frequent trips to the loo can be a sign that your bladder is not working properly but it can also be the symptom of other health issues such as kidney disease or even a cancer such as bladder or prostate cancer.

If you find you are needing to pee more frequently, or find it hard to hold your pee, go and see your GP and get checked. The sooner you can put your mind at rest, or get help for your symptoms, the better.

theurologyfoundation.org/needtopee

The Urology Foundation is a medical charity (no.1128683) working to improve the lives of people with a urological condition. We fund research, training and education into all urological conditions and diseases including urinary incontinence and cancers.
