

THE UROLOGY FOUNDATION

1 in 8 UK males will be diagnosed with prostate cancer in their lifetime

1 in 4 black males will be diagnosed with prostate cancer in their lifetime

- Some experience a variety of symptoms but others have no symptoms
 - Knowing the signs can save lives
 - If you have any concerns about your risk of prostate cancer or symptoms, speak to your GP
-

The Urology Foundation is committed to supporting patients, families, the medical and scientific community and all those involved in prostate cancer care.

Prostate Cancer: Know the signs

**Some experience no symptoms
but symptoms can include:**

Having problems with your pee (like difficulty starting or maintaining your pee, pain when peeing, needing to pee often and urine leakage)

Pain when ejaculating

Blood in pee or semen

Finding it difficult to get an erection or maintain one

**If you experience any of these symptoms,
speak to your GP**

**Share your stories of your experiences of
prostate cancer using #ProstateCancerAndMe**
