

The Face of Continence

"People talk about hot flushes, but no one talks about menopause and bladder issues"

"Continence issues affect people of all ages. It can have a profound impact on people and we don't talk about it enough. It's time to break the silence and stigma around bladder issues together."

"So many men talk about prostate cancer but they don't talk about the bladder issues that can happen following treatment that dramatically impact confidence"

"Lots of women struggle to control their bladder after having children and it can stop them doing what they want to do with their children"

You're not alone

1 in 5 people experience bladder problems
