THE UROLOGY FOUNDATION

Men's Urology Health in the UK

1 in 2

of us will experience a urology condition in our lifetime[1]

Urology health relates to the parts of your body responsible for producing, storing and discharging urine (kidneys, bladder, urethra) and in males it also involves the parts of your body involved in sexual function (prostate, penis, and testicles).

over 2 MILLION

men experience urinary incontinence[2]

1 in 3

of all men over 50 will have some symptoms of prostate enlargement[3]

This can impact their quality of life

There are five urology cancers that impact males:

Nearly

75,000

males are diagnosed with a urology cancer every year

That's over

200

males diagnosed every day

1 in 8 males in the UK will be diagnosed with prostate cancer in their lives[4]

1 in 4 black males in the UK will receive a prostate cancer diagnosis in their lifetime[5]

CAMPAIGN IS KINDLY SUPPORTED BY

convatec | Continence Care
