The Urology Foundation funds cutting edge research, supports health care professional training and raises awareness of urology disease including cancers of the kidneys, bladder, prostate and the male reproductive system to chronic and life disrupting diseases such as incontinence, kidney stones and UTIs.

The Urology Foundation works with researchers, urologists, nurses and allied health care professionals, influencers and decision makers, patients and their families in order to improve the nation's urology care.

The Urology Foundation is a medical charity (no.1128683) working to improve the lives of people with a cancer or condition of the kidneys, bladder, prostate or male reproductive system. By investing in the research, training and education in to all urological diseases, including urinary incontinence and cancers, and raising public awareness of all urology conditions, we are striving to end the suffering caused by these diseases and save lives.
