

Urinary Tract Infections

account for up to

9 MILLION
GP VISITS per year
in the UK

AROUND HALF
of all **WOMEN**
will be treated for
a symptomatic
UTI during their lifetime

If **UNTREATED**,
UTIs can lead to
KIDNEY
INFECTION
or **SEPSIS**

Knowing the signs to spot
and talking to your GP will
make a real difference

Don't be afraid to talk to your GP about:

- Needing to pee more often than usual
- Burning sensation when passing urine
- In women, an uncomfortable pressure above the pubic bone
- Cloudy or reddish urine if blood is present
