What is your risk of prostate cancer?

**Risk Factors**
- Aged 50 and above
- Overweight
- Family history of prostate and breast cancer
  - Affecting 1 in 8 men

**See your GP if you have**
- Difficulty passing urine
- The sudden urge to pee
- An inability to empty your bladder
- A need to pee more frequently
- Blood in pee or semen

These symptoms can also be caused by other things that aren’t prostate cancer, but it is a good idea to get it checked out so you can get the right treatment if you need it.

The Urology Foundation is a medical charity (no.1128683) working to improve the lives of people with a cancer or condition of the kidneys, bladder or male reproductive organs. We fund research, training and education into all urological conditions and diseases including urinary incontinence and cancers.
